DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I Claims 1-28, drawn to a capacitor apparatus, classified in class 361, subclass 508
 - II. Claims, 29-32 drawn to a capacitor apparatus, classified in class 607, subclass 5.
 - III. Claims 34-40, drawn to a method of making a capacitor, classified in class 29, subclass 25.03.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case invention III can be carried out in photographic flash equipment where high energy, high voltage and space efficient capacitors are desirable.
- 3. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because other types of flat capacitors could be used such as flat capacitor wherein the seal includes an insulating sleeve, a nut, a gasket and other hardware around the feedthrough

Application/Control Number: 09/706,579

Art Unit: 3742

wire. The subcombination has separate utility such as being used in a semiconductor device to form high density ferroelectric memory devices.

- 4. Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case invention III can be carried out in photographic flash equipment where high energy, high voltage and space efficient capacitors are desirable.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 6. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species A: Capacitor with epoxy seal as depicted in Figures 1-3,

Species B: Capacitor with plug seal as depicted in Figure 10.

If Applicant elects Species A above, then Applicant is further subject to the additional election of patentably distinct subspecies of Species A as outlined below:

Subspecies A1: Coupling member as depicted in Figures 4, 5a, 5b, 6-7,

Subspecies A2: Coupling member as depicted in Figures 8a, 8b.

If Applicant elects Species B above, then Applicant is further subject to the additional election of patentably distinct subspecies of Species B as outlined below:

Subspecies B1: Plug member as depicted in Figure 11,

Application/Control Number: 09/706,579

Art Unit: 3742

Subspecies B2: Plug member as depicted in Figure 12.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was made to Peter Maki on 12/26/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3742

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the 8. inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shawntina T. Fuqua whose telephone number is (703) 305-2581. The examiner can normally be reached on Monday-Friday 8-4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teresa Walberg can be reached on (703) 308-1327. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3463 for regular communications and (703) 305-3463 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0861.
